

13016235: C Programming
First Semester, 2018
Project Proposal

1. Project developer

-Student ID: 61090030 Name: Sathienpong Polachan

2. Project title

-Contacts management

3. Project description and requirements

Project description:

(Note: figures, flowcharts, diagrams may be used to describe the project)

-What its about?

-This project is about storing your contact in the program and when you input specific contact in the program, it will indicate address, mail and all the info you need to make your life easier. You can also add, change or delete your new contact all the times. You can find all the list you have in the list menu, so you can find your contact more convenient.

Project requirements:

- Include <stdio.h>
- GUI
- User inputs from GUI
